FOR SCIENCE!

A Study in Comedy

Created by
Christine Lesiak
& Ian Walker

Join **The Professor** and her **Lab Assistant** on a behavioural science adventure!

You'll be captivated as they expertly navigate the audience through an array of progressively intricate challenges, all done without uttering a single word. The fun begins with a simple desk bell, escalates into an exhilarating Nerf gun showdown, and culminates in an astonishing and jaw-dropping musical finale. Brace yourself for a side-splitting fusion of Bill Nye the Science Guy's passion for discovery and the playful antics of the Blue Man Group.

Prepare yourself for some seriously uproarious scientific shenanigans!

Fun for kids 10+, families, & adults of all ages!

The Edmonton Journal

"utterly charming... a gem"
CBC

VUE Magazine

"fabulously funny"
Winnipeg Free Press
